

## **Title: TISHMAN SEARCH LAND**

**Tishman** is checking opportunities for construction of luxurious residential complex in the suburbs of Sofia, announced Pepa Dimitrova, managing the Bulgarian office of the company. We are interested in management of holiday real estates. There is still a lack of A-class office areas in Bulgaria and this will not change soon, foresees Pepa Dimitrova. There are many buildings in Bulgaria, pretending to offer high-class office areas. However, almost none of them have the EU A-class standards. Most ventilation and electrical supply systems are of very low quality. The **Sofia Airport Center** project has the ambition to fill this gap.
